Boca Raton, FL 33496

Dear Elliot,

On Saturday night, January 25th, a volunteer member of the local Fire Department in Hot Springs, Arkansas received a text from your AED Link system asking her to respond to a reported SCA event that was 2 blocks from where she was. She is listed in your National AED Registry as a responder for the AED she has in her car.

Although she was on her way to a non-medical call, she texted back "ok". When she arrived, the victim was not in cardiac arrest, but it is interesting to note that she reported receiving the text nearly 2 minutes before the tone out from the local CAD system.

This is the second time she has been called to assist with her AED. Your program really works great for our area. We are continuing with the process of getting more AED owners in our area to enroll in your program and become volunteer citizen responders.

Thanks again,

Sincerely,

David Baumgardner
President/C.E.O.
